

# LEAK DETECTION

## DPG6000

### KEY FEATURES:

The DPG6000 is a compact; microprocessor based leak detector designed for containers with capacities from 100ml to 6Ltr sizes.

The DPG6000S is capable of testing in excess of 6,000 units per hour, depending on the size and shape of the container.

Test air pressure inside the container is displayed on the control panel-making test / fail air pressure threshold setting easy. A test pressure range of 0,50kPa to 4,75 kPa is attainable.

The DPG6000 has been designed for easy operation, as the unit requires almost no tools for adjustment.

As the DPG6000 is a quality control device to help you maintain your quality; it must be set up and maintained accordingly.

Inclusion Test Head complete with probe and sensor
